W chorwackim czasopi?mie etnologicznym "[Etnoska Tribina](#) [2]" ukaza? si? artyku? pt. "**The Art of Green Maintenance. Future Making in Urban Gardening**" wspó?autorstwa Anny Horolets, po?wi?cony roli pracy zachowawczej (maintenance) i troski w miejskich inicjatywach zielonych. Autorki tak streszczaj? jego zawarto??:

Urban gardening plays a major role in how sustainable futures are imagined and envisaged, but the focus on its innovative potential tends to obscure the diverging logics at play. We draw upon ethnographic fieldwork at the community garden Onkraj gradbiš?a in Ljubljana, which was conceptualized primarily as a social and cultural innovation. Yet, it continuously called for maintenance and care practices in which the organizers and the gardeners had to engage to make it last. We argue that maintenance labor is crucial for sustainable urban future-making practices.
