The 2007 two-volume collection *Anthropological Perspectives on Gender* has been a major contribution to the emergence of gender and sexuality as topics in Polish ethnology and cultural anthropology as well as in other human and social sciences. Today – almost two decades later – we offer an extended edition that provides an insight into the new and developing subjects post-2007: the questions of race and racism, feminine forms of expression, gendered aspects of migration, post-Cold War development of feminism, and gendered violence during

ethnographic fieldwork. Unlike the 2007 version, the edition also contains original Polish texts.

Keywords: gender, anthropology, state, migration, sexual violence, family, racism, masculinity, post-colonialism, post-socialism, ethnography, methodology.
